

To Whom It May Concern:

Vivek Bhat  
160<sup>th</sup> Ave  
Beaverton 97006  
Oregon, USA

My Name is Vivek and I am a Software Engineer working for Intel. My experience here at Intel has provided me with the innovative and technical skills necessary to successfully provide your company with multifaceted technical solutions across a wide range of software platforms.

At Intel, I have been leading an Angular based web application that predicts promotions and discounts for retailers. The application has APIs written in Python Flask and hosted in AWS Flask and AWS API Gateway. The database runs on a PostgreSQL engine on AWS RDS instances and the User Interface uses Angular 8 framework.

Details of my other projects and experiences can be found on my resume or on my personal Angular 9 based website: <https://vivekbhat.me> and on my github profile: [github.com/VivekBhat](https://github.com/VivekBhat).

Sincerely,  
Vivek Bhat
